1.	<u>Comment</u> . Numerous observations, also at other troop units in the zone, indicate that fall maneuvers will start in the second half of September. The AAA unit mentioned in paragraph 2 is the 2503d Gds AAA Regt of the 19th Gds Mecz Div, light units of which transferred	25 X 1
•	to Altengrabow on one train on 31 July.	+25X1
2.	Comment. The train presumably carried AAA units en route to Wustrow.	25 X 1
3.	Comment. According to information in paragraph 4, elements of the 25th Gds RL Brig were transferred on 31 August, possibly to Altengrabow. They are believed to have returned to their post on 7 September. According to source of paragraph 5, the brigade had been allotted new rocket launchers in late July and mid-August, which, according to the present information, may have been rocket launchers of a new type with a caliber of 220 to 240 mm. This type of rocket launcher was first observed during the 1954 May Day parade in Moscow.	25X1
4. _	Comment. This is presumably the same shipment which, went from Altengrabow to Doeberitz on 9 September. It may have involved light AAA units of the 1st Mecz Div which moved	25X1 25X1
X	to Altengrabow on 18 August.	25 X 1
